POWER

INDEX TO VOLUME XLI

January 1 to June 30, 1915

Explanatory Note

Illustrated articles are marked with an asterisk (*), book notices by a dagger (†), inquiries by a double dagger (‡). The cross-references condense the material and assist the reader, but are not to be regarded as complete or conclusive. So, if there were a reference from "Boiler" to "Blowoff," and if the searcher failed to find the required article under the latter word, he should look through the "Boiler" entries, or others that the topic might suggest, as he would have done had there been no cross-reference. A reference from "Oil" to "Lubricating," would apply equally to "Lubrication," "Lubricator," etc. Letters are indexed under title or subject, general articles under writer's name as well. Not all articles relating to a given topic necessarily appear under the same entries.

Following is a list of the pages included in the several numbers of the volume, by date:
